# Develop workplace policy and procedures for sustainability

Learn to develop and implement integrated sustainability policies and procedures within an enterprise.

This unit is based on the sustainability guideline standard GCSSUS03A *Develop workplace policy and procedures for sustainability*.

At the end of this training you will be able to:

- Develop workplace sustainability policy
- Communicate the policy.
- Implement the policy
- Review policy implementation

This knowledge and competence will assist you to help the enterprise to:

- develop relevant policy and procedures that comply with the regulatory requirements and business plans
- develop a workable implementation strategy
- include measurable criteria for reviewing improvement.
- ensure policy implementation is reviewed
- ensure policy is developed to become part of the routine practices of the organisation.

### Who should come?

Team leaders/supervisors/managers who are required to develop approaches to sustainability within workplaces, including the development and implementation of policy as it includes:

- Communicating with relevant stakeholders
- Developing and monitoring sustainability policies
- Reviewing and improving sustainability policies.

At the completion of training competency will be recognised with a statement of attainment provided by the registered training organisation for MSAENV672B
