Beyond Compliance

In today's complex trading world, organisations of all types, sort, size and nature have many forms of compliance, governance, or expectation from their society, funding-providers, regulators, buyers, or other stakeholders.

This represents a complex, continually changing framework where regulated, semi-regulated, self regulated or voluntary compliance is expected. Global-Mark aims to provide a complete suite of programs, which delivers trust and confidence.

Many components of their requirements often overlap. Regulatory, funding, performance or supply management or product/service outcomes or expectations are built into our programs, and our ability to offer an extensive suite of programs, within an integrated audit, assessment, review methodology is aimed at removing duplication, saving time, resources and money.

We understand that the outcome of our work, is aimed at building confidence, and to do so, we must be independent, thorough, professional, competent and fair. We need to recognize that our work is often not for our direct Clients, but for their own Clients.

We wish to be rigorous in our assessments and transparent in our decisions. Every Client is treated with the same process and rated on the same scale. We will be part of the solution, as we believe that informed performance is built on sound systems, commitments and processes.
