what is this course about?

This 2 day course is designed to provide a comprehensive and practical understanding of ISO 9001.

In particular it demystifies the more complex aspects of the Standard and explains how a Quality Management System is used to structure business processes which help guarantee your key business objectives.

The practical approach means just that, our training is structured to deliver practical skills which participants need to apply their knowledge to your individual business – who ever you are and what ever you do!

what will you receive?

- Catering for the duration of the course
- Reference workbook to take home
- At the completion of the course, participants receive a Certificate of Completion

what is covered?

Aside from understanding the framework of ISO 9001, participants will discover:

- The importance of the customer
- What the “process approach” really means
- How to ensure your management system locks in its improvements
- The real difference between corrective and preventive action and why preventive action is often ignored but is so critical
- The amount of documentation that is required by ISO 9001
- What an auditor should look for.
